HIGHLIGHTS

MEXICAN AVOCADOS

The transition from the normal crop to Flora Loca supplies is delayed due to ongoing rain in the Michoacan growing region. Expect significantly higher prices for the next two to three weeks.

ONIONS

Harvesting will wind down in California and New Mexico over the next two to three weeks. New crop production will begin in multiple regions throughout August, including Colorado, Idaho, New York, Oregon, and Washington.

ORANGES

The California Valencia crop is dominated by large sizes; small fruit (113- and 138-count) remains limited. With many schools starting in the coming weeks, small-size fruit will become extremely scarce. Size, grade, and country of origin substitutions will be necessary to fill orders.

BELL PEPPERS

- Green bell pepper supplies are increasing as harvesting becomes established in the Midwest and Northeastern regions; markets are easing.
- Red bell pepper demand remains strong; prices are elevated despite new crop production in California.

STRAWBERRIES

- The strawberry market is steady. Santa Maria and Watsonville, California are experiencing great weather. Both areas are past peak season causing numbers to trend downward.
- Watsonville/Salinas growers will begin another cycle of new crop harvesting before Santa Maria begins its fall season in late August or early September.

BRUSSELS SPROUTS

- The Salinas season had a slow start, but volume is increasing; suppliers are in better shape than they were last year at this time.
- Expect prices to start inching down through the month.

Q

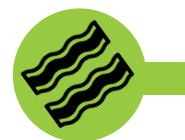

Low- or no-alc beverages continue to climb in popularity, especially with Gen Z and Alphas. What are some produce-driven drink combinations that you can suggest for summer?

A

Fresh herbs as ingredients always make for stand-out flavors that are crisp and refreshing, and add an attractive, visual WOW as well.

Using fresh fruits (pineapple, mango, passionfruit, prickly pear, watermelon, and berries) to make in-house fruit purees and syrups can add bold flavors and be cross utilized as vibrant drink garnishes.

Edible orchids add a beautiful visual element to drinks, and shiso leaves make for an attractive and impressive burst of seasonal freshness to any NA-bev offering.

TIPS FOR SERVING ICEBERG LETTUCE

- 1.** Crisp and crunchy texture; sturdy leaves that work well with creamy dressings; does not wilt as easily as more delicate lettuces.
- 2.** Mildly sweet flavor with a high water content that makes it refreshing and healthy.
- 3.** Pair with toppings like bacon, blue cheese, carne asada, horseradish, and tomatoes.

MENU FEATURE

Every chef needs a few solid recipes in his or her repertoire. That's why Markon has put together a catalog of fresh produce-based recipes that cover it all: day- and menu-parts, the range of seasons, a variety of cuisines, and a diverse list of ingredients.
